

METHOD FOR ENCOURAGING LOWERING OF A TOILET SEAT LID**ABSTRACT OF THE DISCLOSURE**

Lowering of a toilet seat lid onto a toilet seat when a toilet is not in use is encouraged by the use of a toilet seat lid having a lid body, with an upper surface, and an actual map secured, typically laminated, to the upper surface. The map is visible when the toilet seat lid is lowered onto the toilet seat. The area of interest may be an activity of interest and/or a geographical area of interest of interest for a potential user. The map may also be personalized for a potential user. The map may comprises at least one of the following: an aircraft navigation map, a nautical chart, a ski lift/run map, a road map, a trail map and a topographic map.
